homotypic cell–cell adhesion		platelet aggregation		heterochromatin formation heterochromatin formation		platelet activation
		-cell adhesion positive regulation of				coagulation platelet activation
of cell adhesion		cell-cell adhesion		negative regulation of response to external stimulus		negative regulation of coagulation
regulation of cell adhesion		regulation of cell-cell adhesion				regulation of coagulation
		regulation of boonse to bunding		ody fluid levels	cell activation protein activation cascade	
regulation of wound healing		ealing	regulation of body fluid levels			
wound healing of re		gulation esponse rounding hemo		ostasis
